Subject Index

Adhesion molecules LFA-3 and N-CAM, expression of, on normal and malignant human plasma cells (BARKER *et al*), 331
AIDS in HIV-1 infected thalassaemia patients, incidence of (COSTAGLIOLA *et al*), 109
Anaemia, severe aplastic, treatment with total lymphoid irradiation and methylprednisolone (MEHTA *et al*), 127
Antiglobulin crossmatch, a prospective study to determine the safety of omitting from pretransfusion testing (HEDDLE *et al*), 579
Ara-C, low dose, a predictive model for the clinical response to: a study of 102 patients with myelodysplastic syndromes or acute leukaemia (HELLSTRÖM-LINDBERG *et al*), 503

Benzaldehydes (12C79 and 589C80), substituted, that stabilize oxyhaemoglobin also protect sickle cells against calcium-mediated dehydration (STONE *et al*), 419
Ber-H2 (anti-CD30)-saporin immunotoxin: a new tool for the treatment of Hodgkin's disease and CD30+ lymphoma: *in vitro* evaluation (TAZZARI *et al*), 203
Book reviews
Blood: Atlas and Sourcebook of Haematology, 462
Coagulation and Blood Transfusion, 461
Haemostasis and Thrombosis in Obstetrics and Gynaecology, 461
Inorganic Biochemistry of Iron Metabolism, 140
Integrins and ICAM-1 in Immune Responses, 462
The Living Haemopoietic Microenvironment, 461
Bronchial carcinoma, the relationship between increased platelet count and magakaryocyte size in (KRISTENSEN *et al*), 247

CD45R expression, abnormal, in patients with common variable immunodeficiency and X-linked agammaglobulinaemia (RICHARDS *et al*), 160
CD71 (transferrin receptor) expressing erythrocytes by multiparameter-flow-cytometry (MP-FCM), identification of: correlation to the quantitation of reticulocytes as determined by conventional microscopy and by MP-FCM using a RNA-staining dye (SERKE & HUHN), 432
Chromosome 11q rearrangement in B non Hodgkin's lymphoma (VANDENBERGHE *et al*), 212
Cytarabine, intermediate versus conventional-dose, as intensive induction for acute myelogenous leukaemia, a randomized study of (SCHILLER *et al*), 170

Desferrithiocin is an effective iron chelator *in vivo* and *in vitro* but ferrithiocin is toxic (BAKER *et al*), 424
Diamond-Blackfan anaemia, oral megadose methylprednisolone for treatment of (ÖZSOYLU *et al*), 135
Dyscrasias, plasma cell, molecular analysis of clonality in (MIGLINO *et al*), 18
Dysgenesis, reticular, use of recombinant granulocyte colony stimulating factor in (BUJAN *et al*), 128
Dyskeratosis congenita, bone marrow transplantation for (CHESSELLS *et al*), 314

Epidermolysis bullosa acquisita induced by GM-CSF: a role for eosinophils in treatment-related toxicity (WARD *et al*), 27
Erythropoiesis after bone marrow transplantation, evaluation of: quantitative reticulocyte counting (DAVIES *et al*), 12
Erythropoietin, high-dose recombinant, the *in vitro* effect of, on granulocyte-macrophage colony production in premature infants using a defined serum deprived cell culture system (WARD *et al*), 325
Erythropoietin production, extrarenal and renal, in anaemic rats, cellular sites of (SCHUSTER *et al*), 153
Erythropoietin, serum, in the diagnosis of polycythaemia and after phlebotomy treatment (BIRGEGÅRD & WIDE), 603
Esterase, human monocyte-specific (MSE), purification of: molecular and kinetic aspects (SCOTT *et al*), 470

Factor VIII gene deletions in haemophilia A patients in Czechoslovakia (KŘEPELOVÁ *et al*), 271
Factor VIII gene, GAA(Glu)272→AAA(Lys) and CGA(Arg)1941→CAA(Gin) in, in two haemophilia A patients of Czech origin (KŘEPELOVÁ *et al*), 458
Factor VIII in substrate plasma, trace levels of (HIRST *et al*), 305
Factor VIII light chain, a monoclonal antibody (NMC-VIII/10) to, recognizing Glu^{1675}–Glu^{1684} inhibits factor VIII binding to endogenous von Willebrand factor in human umbilical vein endothelial cells (SHIMA *et al*), 533

Gamma heavy chain disease developing in association with myelodysplastic syndrome (ELLIS *et al*), 125
Glanzmann's thrombasthenia, a variant of, which fails to express a GPIIb–IIIa related epitope that is recognized by a specific monoclonal antibody (C17) (ESCOLAR *et al*), 545
Glycoprotein I, β_2-, lupus-like anticoagulant properties of murine monoclonal antibodies to (ARVIEUX *et al*), 568
Glycoprotein IV (CD36)-deficient platelets from seven healthy Japanese donors, normal aggregations of (YAMAMOTO *et al*), 86
Graft-versus-host disease, ultraviolet irradiation modulates MHC-alloreactive cytotoxic T-cell precursors involved in the onset of (VAN PROOIJEN *et al*), 73

Haemoglobin Atlanta-Coventry (B75 Leu→Pro, 141 Leu deleted), the deletion in, is not present at the nucleotide level: a family with haemolytic anaemia and three β-globins (GEORGE *et al*), 93
Haemophilia, infusion of clotting factor concentrates in (GOMPERTS) 625
Haemophilia B, subcutaneous injection of factor IX for the treatment of (GERRARD *et al*), 610
Haemophiliacs, seronegative and seropositive, PCR analysis of HIV-1 sequences and differential features in (CHELUCCI *et al*), 558

Heparins, ratios of anti-factor Xa to antithrombin activities of, as determined in recalcified human plasma (SCHOEN *et al*), 255
Hepatitis C antibody profile in adults with haemophilia and their sexual partners (LEE *et al*), 133
H-ferritin, denatured human, antibodies for, stain only reticulo-endothelial cells within the bone marrow (RUGGERI *et al*), 118
Hodgkin's disease, autoimmune processes terminating 24 years later in (FERNÁNDEZ *et al*), 308
Hodgkin's disease, very poor risk, mini-BEAM followed by BEAM and ABMT for (CHOPRA *et al*), 197
Hypereosinophilic syndrome, ring eosinophils in (RANI *et al*), 132

Idiopathic thrombocytopenic purpura, acute, HLA-DR expression by platelets in (BOSHKOV *et al*), 552
Idiopathic thrombocytopenic purpura, chronic, clinical study on determination of serum oestradiol in (QINGXUE *et al*), 626
IFNα therapy, effect on secondary Ph^1-positive clones (DONTI *et al*), 45
Interferon-α during pregnancy in chronic myelogenous leukaemia and hairy cell leukaemia (BAER *et al*), 167
Interleukin-4 and nerve growth factor can act as cofactors for interleukin-3-induced histamine production in human umbilical cord blood cells in serum-free culture (RICHARD *et al*), 6

Leukaemia, a B-chronic lymphocytic, t(14:18) and BCL-2 gene rearrangement in (JONVEAUX *et al*), 620
Leukaemia, acute lymphoblastic, shedding of CD9 antigen by bone marrow cells from patients with (KOMADA *et al*), 526
Leukaemia, acute megakaryocytic, and transient abnormal myelopoiesis in Down's syndrome, mixed phenotype of blasts in (YUMURA-YAGI *et al*), 520
Leukaemia, acute myelogenous, P53 gene mutations in (HU *et al*), 489
Leukaemia, acute myeloid, at first relapse, surface marker expression in (THOMAS *et al*), 40
Leukaemia, acute myeloid, the value of detecting surface and cytoplasmic antigens in (URBANO-ISPIZUA *et al*), 178
Leukaemia, acute myeloid, with an unusual phenotype: myeloperoxidase (+), CD13 (−), CD14 (−) and CD33 (−) (SESHI *et al*), 374
Leukaemia, acute promyelocytic (AVVISATI *et al*), 315
Leukaemia, atypical chronic myeloid, t(8:9) (p11:q32) in: a new cytogenetic–clinicopathologic association (JOTTERAND BELLOMO *et al*), 307
Leukaemia, B-cell chronic lymphocytic, non-radioactive *in situ* hybridization for the detection and monitoring of trisomy 12 in (CUNEO *et al*), 192
Leukaemia cells, human, analysis of the TNF receptors on, by affinity cross-linking (ELBAZ *et al*), 530
Leukaemia, childhood lymphoblastic, cytomorphology of: a prospective study of 2000 patients (LILLEYMAN *et al*), 52
Leukaemia, chronic lymphocytic, immunophenotypic subclassification of (KUREC *et al*), 45
Leukaemia, chronic myeloid, in first chronic phase, HLA-identical sibling donor bone marrow transplantation for: influence of GVHD prophylaxis on outcome (MARKS *et al*), 383
Leukaemia, chronic phase chronic myeloid, relapse into blast crisis following bone marrow transplantation for: a report of five cases (CULLIS *et al*), 378
Leukaemia, *de novo* acute myeloid, prognostic importance of myeloperoxidase positivity in (VALDÉS *et al*), 449
Leukaemia, *de novo* acute myeloid, remission with morphological myelodysplasia in: implications for early relapse (NAGAI *et al*), 33
Leukaemia, granular lymphocyte, with multiple myeloma (SNOWDEN *et al*), 622
Leukaemia, hairy cell, effects of anti-TNF monoclonal antibody infusion in patients with (HUANG *et al*), 231
Leukaemia, infant acute lymphoblastic, the immunophenotype in: correlation with clinical outcome. An Italian multicentre study (AIEOP) (BASSO *et al*), 184
Leukaemia, minimally differentiated acute myeloid (AML-M0), clinico-pathological features of (KEENAN *et al*), 458
Leukaemia, peroxidase positive $CD7^+$ myeloid, expressing only T lymphoid cell membrane markers: a new entity (PHILIP *et al*), 138
Leukaemia, Philadelphia positive acute, with minor breakpoint cluster rearrangement may be a stem cell disease (JACKSON *et al*), 77
Leukaemia, Ph-positive chronic myelogenous, combination therapy with interferon alpha-2b plus low-dose interferon gamma in pretreated patients with (WANDL *et al*), 516
Leukaemia, relapsed acute myeloid, effective treatment of with drugs chosen by DiSC assay (PARKER *et al*), 455
Lymphocytes from multi-transfused patients exhibit cytotoxicity against autologous cells (KAMINSKI *et al*), 23
Lymphoma, non-Hodgkin's, bone marrow involvement in: increased diagnostic sensitivity by combination of immunocytology, cytomorphology and trephine histology (SCHWONZEN *et al*), 362

Macrocytosis, red cell, and chronic obstructive airways disease (BOOTHROYD *et al*), 453
Macrophage colony-stimulating factor, the effect of, on haemopoietic recovery after autologous bone marrow transplantation (KHWAJA *et al*), 280
*mdr*1 mRNA, multidrug resistance gene, in a subset of normal bone marrow cells, expression of (MARIE *et al*), 145
Megakaryocytopoiesis, new insights into the regulation of, by haematopoietic and fibroblastic growth factors and transforming growth factor β1 (HAN *et al*), 1
Methotrexate, moderate-dose, transient neurologic disturbances in a child treated with (BORGNA-PIGNATTI *et al*), 448
Methylprednisolone, megadose, for pure red cell aplasia (ÖZSOYLU), 625
Monoclonal gammopathy of undetermined significance, amylase production in (SAWAMURA *et al*), 131
Monoclonal gammopathy of undetermined significance, malignant transformation and life expectancy in (BLADE *et al*), 391
Myelodysplasia, can it evolve into aplastic anaemia? (WANG *et al*), 450
Myelodysplastic syndrome (MDS)-associated inhibitory activity on haemopoietic progenitor cells: contribution of monocyte-derived lipid containing macrophages (MDLM) (OHMORI *et al*), 67
Myelodysplastic syndrome cases, two, with the inv(11)(p15q23) as a sole chromosomal abnormality (MITANI *et al*), 512
Myelodysplastic syndrome, clonal lymphocytes are detectable in only some cases of (CULLIGAN *et al*), 346
Myelodysplastic syndrome, detection of latent subclones with abnormal karyotypes by long-term marrow cultures in cases of (TAMURA *et al*), 353
Myelodysplastic syndrome, extended cytogenetic follow-up of patients with (WHITE *et al*), 499
Myelodysplastic syndromes, all-trans retinoic acid improves erythropoiesis in: a case report (VISANI *et al*), 444
Myelodysplastic syndromes in childhood: a population based study of nine cases (HASLE *et al*), 495
Myelodysplastic syndromes, therapy with human recombinant erythropoietin in patients with (RAZZANO *et al*), 628
Myelofibrosis, primary, the role of the spleen after bone marrow transplantation for (SCHMITZ *et al*), 616
Myeloma, multilobulated, multinucleated multiple (SIVAKUMARAN *et al*), 622
Myeloma, multiple, comparison of chromosome analysis and BCL-1 rearrangement in a series of patients with (FIEDLER *et al*), 58
Myeloma, multiple, conserved natural humoral immunity to thyroglobulin in patients with (BOUANANI *et al*), 62
Myeloma, multiple, measurement of free kappa and lambda chains in serum and the significance of their ratio in patients with (NELSON *et al*), 223
Myeloma, multiple, monitoring circulating B cells in patients with, at diagnosis or in plateau phase: how prevalent is light chain isotype suppression? (KING & RADICCHI), 218
Myeloma, multiple, rare occurrence of P53 gene mutations in (PREUD'HOMME *et al*), 440

Myeloma, multiple, responsiveness of bone marrow erythroid progenitors (CFU-E and BFU-E) to recombinant human erythropoietin (rh-Ep) *in vitro* in (AOKI *et al*), 463
Myeloproliferative disorders treated by alpha-interferon, disappearance of spontaneous erythroid colonies in patients with (TEOFILI *et al*), 310

NB 1 antigen, further characterization of the, as a variably expressed 56-62 kD GPI-linked glycoprotein of plasma membranes and specific granules of neutrophils (GOLDSCHMEDING *et al*), 336
Neutropenia, prevention of infection during (BOUGHTON), 311
Neutrophils, human, and heparin, specific binding between (LECULIER *et al*), 81
N-RAS oncogenes in human leukaemia cells, detection of allele-specific expression of (LÜBBERT *et al*), 370

p53 gene, mutation of does not play a critical role in myelodysplastic syndrome and its transformation to acute leukaemia (TSUSHITA *et al*), 456
p53 tumour suppressor gene in haematological neoplasma, mutations of (MORI *et al*), 235
Parvovirus B19, human, in clotting factor concentrates: B19 DNA detection by the nested polymerase chain reaction (ZAKRZEWSKA *et al*), 407
Parvovirus infection, human, and transient erythroblastopenia of childhood (MUIR & FITZSIMONS), 622
pH, effect on binding of B_{12} to IF and R-protein (SOURIAL & WATERS), 136
Phagocytosis, studies on macromolecular activators of, from platelets (MAPPs) using anti MAPP murine monoclonal antibodies (YOKOYA *et al*), 241
Plasmodium falciparum: diversity of isolates from Malawi in their cytoadherence to melanoma cells and monocytes *in vitro* (GOLDRING *et al*), 413
Platelets, acid-treated random donor, treatment of alloimmunized, thrombocytopenic patient with (SIVAKUMARAN *et al*), 134
Platelet alloimmunization after multiple transfusions: a prospective study of 50 patients (GODEAU *et al*), 395
Platelet glycoprotein IB in a patient with chronic renal failure and Glanzmann's thrombasthenia (NOMURA *et al*), 131
Platelet PLA^1/PLA^1, PLA^1/PLA^2 and PLA^2/PLA^2 genotypes, development of a monoclonal antibody capable of differentiating (LIN-XING *et al*), 113
Platelet storage for transfusion, amino acid metabolism during (MURPHY *et al*), 585
Protein C gene mutation present in the asymptomatic and not in the thrombosis-prone lineage, rapid detection of (BERNARDI *et al*), 277
Pyridoxal 5-phosphate therapy in a patient with myelodysplastic syndrome and adult onset congenital erythropoietic porphyria (YAMAUCHI & KUSHIBIKI), 614

Serum erythropoietin levels during haematinic therapy (KENDALL *et al*), 630
Sickle cell disease, red blood cells from patients with, exhibit an increased adherence to cultured endothelium pretreated with tumour necrosis factor (VORDERMEIER *et al*), 591
Sickle cell patients, plasma factor VII and thrombin–antithrombin III levels indicate increased tissue factor activity in (KURANTSIN-MILLS *et al*), 539
Sickle cell vaso-occlusive crisis, rheological changes in the prodromal and established phases of (AKINOLA *et al*), 598
Spherocyte membrane, constitution and behaviour of (MARQUES DA COSTA *et al*), 624
Spherocytosis, hereditary, *in vitro* proteolysis of red cell membrane in (MARQUES DA COSTA *et al*), 312
Splenectomy, predicting response to in thrombocytopenic children (REID & NAJEAN), 454

T cells, $\gamma\delta$, the function of (DOHERTY), 321
Thalassaemia, α, a PCR-based strategy to detect the common severe determinants of (BOWDEN *et al*), 104
Thalassaemia, β, in Burma, the spectrum of (BROWN *et al*), 574
Thalassaemia, β-, mutations in the population of Cyprus (BAYSAL *et al*), 607
Thalassaemia, β-, nonsense 37 mutation in Catalonians from the Ebro delta, high prevalence of (GALLANO *et al*), 126
Thalassaemia, β-, phenotype not linked to the β-globin cluster in an Italian family (MURRU *et al*), 283
Thrombocytopenia, heparin-associated, in a patient treated with polysulphated chondroitin sulphate: evidence for immunological crossreactivity between heparin and polysulphated glycosaminoglycan (GREINACHER *et al*), 252
Thrombosis, deep venous, and pulmonary embolism in a patient with type III von Willebrand's disease, protein C and antithrombin III deficiency (BOWEN *et al*), 446
Ticlopidine and severe aplastic anaemia (GARNIER *et al*), 459
Tissue factor on human monocytes, modulation by cisplatin and adriamycin (WALSH *et al*), 480
Trisomy 8 detection in granulomonocytic, erythrocytic and megakaryocytic lineages by chromosomal *in situ* suppression hybridization in a case of refractory nocturnal haemoglobinuria (PARLIER *et al*), 296

vav: a molecule for all haemopoiesis (KATZAV), 141
von Willebrand's disease, acquired, due to excessive fibrinolysis (EIKENBOOM *et al*), 618
von Willebrand's disease, a new variant of: Type I Padua (CASONATO *et al*), 615
von Willebrand factor in human fetal plasma, electrophoretic and functional characteristics of (MAZURIER *et al*), 263
von Willebrand factor, unique expression of, by type IIA von Willebrand's disease endothelial cells (WILBOURN *et al*), 401
